

6. (Amended) A method comprising displaying Scripting language encoded line-formatted materials under the control of a web browser such that the line-formatted materials are displayed under control of the web browser in two or more adjacent columns of a screen display, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

11. (Amended) A method comprising encoding line-formatted materials to be displayed using a web browser with one or more Scripting language codes that specify to the web browser that the line-formatted materials are to be displayed in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

12. (Amended) A machine readable document encoded in a carrier medium, wherein the document includes line-formatted materials and the materials are encoded with one or more Scripting language codes that specify to a web browser that the line-formatted materials are to be displayed in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

13. (Amended) A program product comprising a computer program encoded in a carrier medium, the program code operative on a suitably configured computer to display line-formatted materials on a screen display in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

18. (Amended) A program product comprising a computer program encoded in a carrier medium, the program code operative on a suitably configured computer to display Scripting

language encoded line-formatted materials such that the line-formatted materials are displayed in two or more adjacent columns of a screen display, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

23. (Amended) A program product comprising line-based materials encoded in a carrier medium, line-formatted materials to be displayed using a web browser and encoded with one or more Scripting language codes that specify to a web browser that the line-formatted materials are to be displayed in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

24. (Amended) A machine readable document encoded in a carrier medium, wherein the document includes line-formatted materials and the materials are encoded with one or more Scripting language codes that specify to a web browser that the line-formatted materials are to be displayed in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

25. (Amended) A system comprising a computer programmed to display line-formatted materials on a computer screen display in two or more adjacent columns, wherein lines spill from the bottom of one column to the top of an adjacent column, or from the top of one column to the bottom of an adjacent column, when scrolling through the line-formatted materials.

28. (Amended) [A method] The machine readable document according to claim 12 further wherein the line-formatted materials are displayed in conjunction with graphical elements.

29. (Amended) [A method] The program product according to claim 13 further wherein the line-formatted materials are displayed in conjunction with graphical elements.
